> Open Native Graph DB (ONgDB) is a non-restrictive fork of Neo4j, the world's leading Graph Database. It is a high performance graph store with all the features expected of a mature and robust database, like a friendly query language, ACID transactions and high availability clustering. The programmer works with a flexible network structure of nodes and relationships rather than static tables — yet enjoys all the benefits of enterprise-quality database. For many applications, ONgDB offers orders of magnitude performance benefits compared to relational DBs.

I did a cd to `ongdb-3.2.3/enterprise/neo4j-enterprise` and did a mvn install but its failing

```
sudo mvn clean install -Dlicense.skip=true -Dmaven.test.skip=true -e -U
